

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the heading at page 1, line 4 of the specification, as follows:

~~Field of the Invention~~ FIELD OF THE INVENTION

Please amend the heading at page 1, line 13 of the specification, as follows:

~~Description of the Related Art~~ DESCRIPTION OF THE RELATED ART

Please replace the Abstract with the following:

An information processing system and method ~~are provided which~~ can designate or change a location, to which data should be transferred or stored, easily and flexibly without placing any burden of programming on a user when the data extracted from a database is transferred to spreadsheet application software or the like. ~~The information processing system comprises:~~ A search information storage module ~~for storing~~ stores search information for searching a database in association with identification information;~~;~~ identification An identification information extracting module ~~for scanning~~ scans first data to be used by application software and ~~extracting~~ extracts the identification information;~~;~~ search A search information extracting module ~~for referring~~ refers to the search information storage module and ~~extracting~~ extracts the search information corresponding to the extracted identification information;~~;~~ data A data extracting module ~~for selecting and searching~~ selects and searches the database on the basis of the extracted search information, ~~thereby extracting and storing second data;~~ and A data inserting module ~~for inserting~~ inserts the stored second data into the location from which the identification information of the first data has been extracted.
